

CondorNet™ Learned Decision Logic

Epoch 3 Checkpoint - 8 SuperSets × 32 Sets × Relational Logic

Neural Sensitivity Analysis		
State Block	Contribution	Primary Driver
Market Physics (h)	32-53%	Strike selection, Confidence
Momentum (m)	23-37%	Max Loss, Exit timing
Portfolio (v)	16-30%	Position sizing
Regime (r)	14-25%	Was Profitable prediction

Relational Operator Distribution		
Operator	Usage	Interpretation
< Less Than	~33%	Feature A < Feature B
> Greater Than	~34%	Feature A > Feature B
= Approximately Equal	~33%	Feature A - Feature B < ε
Steepness: 20.0 (soft sigmoid transitions)
