

Message/Memo to the “Team”

I did my own professional trading report so I can monitor my performance during the futures trading competition. Still holding first place by a long shot. *Still alive too* – they have not taken me out...yet!

Max/Min Time in trade

- **Max time in trade: 2h 09m 44s** – ES SELL @ 6958.75 → BUY @ 6961.25 (11:30:16 AM → 1:40:00 PM, 2/11/2026)
- **Min time in trade: 10 seconds** – ES SELL @ 6993.25 → BUY @ 6993.75 (7:42:15 AM → 7:42:25 AM, 2/10/2026)

ES-only performance metrics (Nikkei removed)

Metric	Value	Notes
Total ES Trades	25	All ES trades only
ES Net P&L	\$9,272.50	On \$100K notional base
Expectancy	\$370.90 / trade	Average profit per trade
Win Rate	92%	23 wins, 2 losses
Avg Win	\$409.67	23 winners
Avg Loss	-\$75.00	2 losers (–25, –125)
Max ES Gain	\$1,725	2-lot ES
Max ES Loss	-\$125	Tight stop
Max Drawdown	\$325	Intraday, across all instruments

Risk-adjusted metrics (ES-only)

Assumptions:

- Risk-free rate ≈ 0
- 1R defined as $|\text{average loss}| = \75

Metric	Value	How it's interpreted
Sharpe Ratio	0.94	Trade-level, ES-only – institutional-grade
Sortino Ratio	≈ 14.5	Only two small negative trades → tiny downside volatility
Profit Factor	≈ 62.8	Gross wins / gross losses = 9,422.5 / 150
Expectancy (R-multiples)	$\approx 4.95R$	370.9 / 75
Kelly Fraction	≈ 0.90 (90%)	Theoretical; not to be used literally for sizing
MAR (sample)	≈ 28.5	Return (9.27%) / Max DD (0.325%)

These numbers are extreme because your losses are tiny, your wins are large, and your win rate is very high. In any institutional context, this profile would be considered *exceptionally strong* but also flagged as “must be monitored with more samples” because it’s so good.

R-multiples (ES-only)

Using **1R = \$75** (avg loss):

- **Average trade:** $E[R] \approx 4.95R$
- **Largest ES win:** $1,725/75 \approx 23R$
- **Largest ES loss:** $-125/75 \approx -1.67R$

This is exactly what you want to see:

- Small negative R
- Large positive R
- High positive average R

Integrated table for report (all key metrics)

Metric	All Trades	ES-Only
Starting Capital	\$100,000	\$100,000
Net P&L	\$141,272.50	\$9,272.50
ROE	141.27%	9.27%
Trades	29	25
Wins	27	23
Losses	2	2
Win Rate	93.10%	92%
Max Gain	\$70,000 (Nikkei)	\$1,725
Max Loss	-\$125	-\$125
Max Drawdown	\$325	\$325
Expectancy	\$4,871.46	\$370.90
Sharpe	Skewed by 70K outlier	0.94
Sortino	Extremely high	≈ 14.5
Profit Factor	≈ 942.7	≈ 62.8
NP/DD	434.68	28.5 (MAR-style)

**Statement:**

How do we say it in professional trading terms? Ahem...*School is in session.*

Literally, spanking over 50K professional traders globally. I thought maybe I lost my chops after being framed and sent to prison. This is the first time I have traded manually on Futures since 2021 when I lost everything I own, lost \$250M, my homes, my clothing, my cars, my Harley, my money, literally everything and have been literally terrified to even re-surface in this area. When the big banks come after you and you fight back, this is what happens:

- 1) They turn everyone against you through lies and deception
- 2) They destroy your credibility and your good name through intensive global slandering of your name in the press/public eye through their connections with the SEC, CFTC, Finra, etc. In my case, after whipping their asses two times in a row in intensive courtroom battles, they got with their higher up friends at the SEC, slandered me making me out to be a liar, a thief, an out of control Chairman and CEO, and still to this date use that press release against me to kick me while I am down.
- 3) You then lose everything you own by your best friends of >25 years and family turning against you and stealing everything you own, and using black magic and witchcraft against you to make you sound like you are mentally insane to go along with their lies and bullshit in the press from the SEC.
- 4) They pay off the federal court judges/magistrates who should have recused themselves
- 5) They frame you and set you up and have you sent to prison for years.
- 6) When you are finally free, they make sure you are homeless with the high chance of death in a gutter in the middle of winter in Colorado. I did die on November 16, 2026 being homeless, was fully resuscitated, and had to spend > 7 weeks hospitalized. *I am sure that they are pissed off I am still alive.*
- 7) Trying to get a job in my field of Physics and Software Engineering is impossible as the first thing they see when they look up my name is the heavy slandering press releases from the SEC filled with nothing but lies and deception.,
- 8) With everything gone, my good name destroyed, my credibility gone, my homes, my vehicles, my clothing, my money, and being stuck on Parole, homeless, now currently physically disabled, and no ability to make the money I should be making, they believe they have me by the balls and I will eventually die in a gutter, ghosted from society, all my friends turned against me, can barely even get my own kids to call me or come visit, and the end-result is I am out of their way for good, they get away with theft and practically attempted murder, and they walk off in to the sunset knowing the truth is swept under the cover as the one person with the actual evidence to bring them down is dead, or rotting away in prison.

Luckily, after many years, Crunch got in touch and I met our tea, who has been keeping my fiancé and I alive and off the streets, otherwise, I would probably be dead by now. I am in shock CME allowed me to enter their futures trading competition – no doubt it has circled back

to the serpents, and remember, birds of a feather flock together, but snakes of a pit slither in their own bullshit. Hence why I call them the BS camp!

If I can manage to stay alive and complete this project and the team keeps my name 100% out of the loop and well hidden in the background, with my latest software engineering work with the team, I may just have a chance at recovering from all the irreparable damages they have caused myself, my companies, and my fiancé and I can get back to living a happy healthy life together, which is really all I want and need.

I am seriously concerned though, that from entering this competition and doing so well, I am ringing the bell of destruction, but I cannot just sit here idol, maybe they will leave me alone, I doubt it, but I must try and show the world who I still am. A God-fearing, honest, loving, Pastor, Father, fiancé to my life partner, a family man, former Chairman and CEO for 27+ years, holder of > 40 patents in software engineering in the USA and globally (what caused the WAR to break out in 2013), Physicist, Software Engineer, professional day-trader and algorithmic trading developer, and hard-core skier.

Warm blessings,

/Jerry

I swear under penalty of perjury everything I have stated above is the truth to the best of my knowledge and with GOD as my witness. Amen.

If for some reason I end up dead and get taken out, let this be my testimony, that I died by the hands of the BS camp, a cursory listing but not limited to: Mark Bobak, Stepen Bagwell, John Talbot Sant, Dell Skluzak, Richard Delaney, Laurent E. Coey, Kathleen Pirelli, John Arthur Thomas, Sanja Mayo (former fiancé), Meaghan McDevitt, Elizabeth Mize (former fiancé), Julie Bean, Shannon Plew, among MANY others. These names listed make up the ring leaders of the corporate side faction to destroy my companies, and the personal side faction to destroy me personally, with Kathleen Pirelli being the liaison between the corporate side and personal side and John Arthur Thomas (formerly my best friend of > 25 years until 2019), who still is at large locally here in Colorado trying to bring me down from his intense jealousy and ego. Believe me when I say this – I know I am still being gangster stalked, I know they know where I am, and I know they are not stopping probably until I drop dead, or they kill me and make it seem as if I died from homelessness so they can save face and have the real truth never exposed. I have put all of this on GOD's shoulders; it is no longer my WAR to fight back against. I just want a peaceful, happy, stable life with my fiancé, nothing more, nothing less. As far as the BS camp is concerned, they can take away my freedom, friends, family, homes, cars, money, my ability to work, my good name, my life as a professional, my ability to get a job in my field, and use that press release against me for fools foolish enough to follow the fools. But they cannot take away my brains, my heart still filled with much love, or my soul which belongs to GOD.
